AUTHOR

Endear Friends,

We have been viewing through the media as if there are so many disputes in Tamilnadu. Really there are no problems in Tamilnadu. Only the people of Tamilnadu have understood most of the matters. Therefore they protest against injustice matters. These revolutions are executed as the problems.

There is no problem in developed countries like Singapore, because all these countries are in under control of ILLUMINATIES. So all the Medias are exhibiting these countries are so quiet. But the people of the country do not have any freedom there. They cannot question anything. But concerning Tamilnadu the people have the freedom for living liberally and raising shoulders for the injustice. So it does seem that there are so many problems in Tamilnadu. So please don't repent for the false news about the media. Be Cheerful that we live very happy along with the knowledge and clairvoyance.

Let the Agriculture prosperous Let the Administration reformed.....Let the smile appear in the public face..... Let the Spirituality grow Live Long Life..... Always chant these above mentioned mantras, we can change this world as Peace.

சென்னை பால்கார்

A scenic view of a river with a boat and a city in the background. The river is blue and has a white boat with a canopy on it. The city in the background has several buildings, including a large one with a spire. The sky is blue with some clouds.

The Advanced Water way Road

Healer Baskar, Founder,
Anatomic Therapy Foundation.

Everybody speaking about the River unification and everybody is releasing their suggestions that if we unify all the rivers of India the water scarcity would be solved. But the river unification is not possible. This Article would explain you how far the Waterway Road is possible and why the Water Unification is not possible.

Nowadays the Ground water level of the has been reducing not only at Tamilnadu but also throughout India; more over there is surplus of heavy rain at the most of the places of Tamilnadu.

The flood is at most of the places of INDIA. So many places the Agriculturists are suciding because of not having water. Likewise we have been facing so many problems, but they have been saying only the River unification is the solution. The water unification is not possible. Because it is a practice of circus,

but the waterway implementation is only the possible way. We are going to deal yet very elaborative. The Waterway Road is entirely opposite to the River unification. The waterway road scheme and river unification is differentiated each other.

The Roads which are developed by way of the water route is called the waterway roads. They call this as canal. Instead of connecting the rivers connecting only the canal in accordance to the environmental situation is called Water way road.

So let us know the difference between the waterway road and the river unification.

The advanced waterway road scheme is that forming three kind of waterway road in India. We can bring all the rivers of India through these three kinds of Water way Scheme. This water way scheme is divided into three kinds.

The height of these rivers which flow in south India North India and central India are measured from the Height of the Ocean level. The rivers of south India and central India is differentiated 250meters from the water level.

We may see about the Scheme of three kinds of waterway roads through the nearby Map. The six states like Taminadu, Kerala, Andra, Karnataka ,Telungana,Maha rastra are called as the South India. We may see the sea level difference 250meter through the Map.

Secondly then another 250 meter difference of India Delhi, Bihar, Gujarath, Panjap which is considered as central India level has been mentioned in blue color in the same Map.

Thirdly the 500 meter water level differences of the states like Himalaya, Assam are considered as the North India. This has been illustrated in the same Map.

So the Scheme of the advanced waterway road is connecting all the rivers of the India through the water way roads.

The most important point of this waterway road is that it would be made zero

slope style. It means that the length of waterway roads would be in Zero slope which are made of 250 height difference.

Generally everybody would say the floor level should be slope as if the water should flow fluently. It is a universal truth that the water would flow towards the slope from the altitude place, but concerning this waterway road everywhere Zero slope.

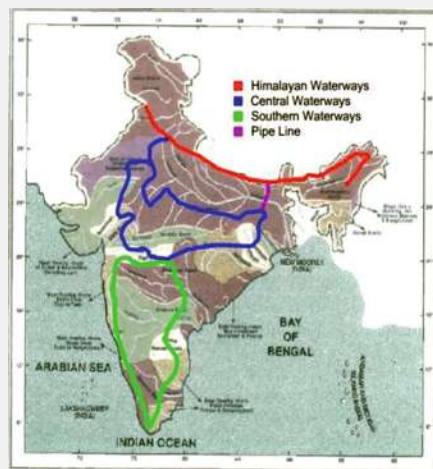

There is a proverb that “the channel would flow towards both side North and South which is made of Experts. If we develop one waterway source the water would flow either direction of Zero slope, more over we can execute the water and fulfill the water. This is called water way road.

The water way road is consists of two channels. Both channels would be the width of 210mtrs 110meters. This 210 width channel is used for the usage of drinking water, Agriculture, Fishing

businessman producing the 1000 voltage of Electricity.

The width of 110mtr channel is used for Transportation of boats and ships.

Every year 1500 pcm of water the quantity

of near about 52000 tcm water is mingled with ocean. If 400pcm water is diverted Out of that 52,000 PCM through the Waterway road the whole India would be fertile and surplus of water. Here by this plan would be very convenient to the Agriculture, Electricity production, and the Ground water level.

The digital survey predicts that if we stagnate the whole year water of the whole year of India that would be inundated the whole India the height of 1meter.

The main feature of this scheme is that there is no usage of motors and smoke. Another mysterious feature is that this scheme is an exposure of more beneficial thought.

This was calculated on 2005 that it would Take the expenditure of 5.25 corers in order to implement this project. It would take near about 5to 10 years to implement this project.

This has been calculated in accordance to the senses of 2005 this project would give the profit of 10,00,00,00 to the Indian Government. So the government can recover the total expenditure of the construction of this project within 6 years. The income of all after this construction will be belonging to the Government.

If this scheme is implemented the ground water level would be available within 50 feet throughout India.

This scheme was implemented by the honorable Mr.A.C kamaraj. He belongs to Madurai. We are going to know elaborative about him in the end of the magazine.

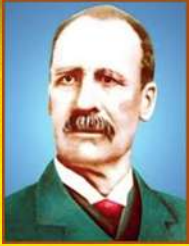

This water way road is one of the most successful plans which are being followed by more countries and states. Let us glance some of the examples.

Example : 1

China has developed such kind of water way Scheme by the distance of 20,000kilometer on other hand china has been generating 70,000 megawatt electricity. The yellow River is called as the tragedy of the China. If we understand the reason why this yellow river is called as the tragedy of china we would understand the benefit of this water way Road. This yellow river had been causing more damages by way of entering inside of this city and villages. The cargoes dam scheme has been designed in favor of avoiding the de damages consecutively during the flood. So if we understand the scheme of the three cargos scheme easily we would know the water way road scheme. so the water way scheme is not a new scheme already it has been implemented in china and in daily usage.

Example : 2

Barkingam channel we would have heard about the Barkingam channel. This channel begins from Andhra and reaches to the river Krishna through the river Godavari and decisively travels to Marikina through Chennai. Even though it is not a zero plan scheme it becomes the water source for so many villages and befits the humanity.

Example: 3

The mullai periyaru scheme was designed by Mr. Benny QUIK who belongs to England. The mullai periyaru has been designed in order to prevent the rain water lest it should dissolve in the ocean which develops during the rainy season at kerala and within a view of fulfill the water necessary of Tamilnadu. On account of This mullai periyaru channel was diverted through the river it is benefiting five of Tamilnadu by way of flowing through the Vaigai river and reaches Ramanathapuram.

It is the truth that 5 more districts are benefitted because of the implementation of The Mullai Periyaru.

Example: 4

Such kind of water way Roads are

available at Netherland. Canada also has such kind of water way roads. Most of the politicians, Actors, and social welfares are promulgating that they would connect the rivers. But no one knew how many rivers are in India? How to connect those rivers? Is there possibility to connect those rivers? How many tunnels must be formed? How many pumps should be fixed? What is the estimation of that scheme? They say just for name sake and

There is great difference between the water way roads and connecting the rivers. We may glance the total history of the river connection abbreviate.

It has 30 connections. There are 14 connections at north and 16 connections south. They have been researching this scheme since 30 years. But no states accept this scheme. The reason is that either state came forward to render water to its surplus water to other insufficient water states. The fear is that if they provide the water to this current movement what about in future when there is the water scarcity. This scheme is yet 30 years under the research of the Central government. That could not come to the conclusion.

Mr. Abdul kalam only the person who had accepted totally Mr. a. c. kamaraj's modern water way road scheme.

Honorable Abdul kalam has described and mentioned in his book the vision 2020 on the pages of 256 to 260 on the Topic the Net work of the Water, more over he has mentioned that the intensive steps should be taken in favor of the implementation of the scheme. Not only had he concluded just by writing in the book but also he has explained along with the previous chief minister Mrs. Jayalalitha in order to implement as possible as quickly. On other hand he has explained along with the EX chief minister MR. Karunanidhi. So this is one of the dreams of Abdul Kalam if we implement this plan his soul would be consoled.

More over Abdul Kalam's assistant Mr. Ponraj also has written a book called the time of youth. He has mentioned very elaborative about the modern water way road and aspiration of Mr. Abdul Kalam on the page of 118 which was published by Narkeran publishers. Are there the benefits out of the Modern water way roads?

1. Hereafter there may not be any devastation during the flood inside of the village or city. If whatever flood comes and whichever state it happens it will be benefitted for so many states by way of irrigated through thousand more kilo meters.

2. We can utilize the flood water lest it should blend into the ocean.

3. We can use the water way road as the two way road for the whole year.
4. The motor pump is not required anywhere.
5. We can use for drinking water.
6. We can use for agriculture.
7. We can generate near about 60,000 mega vat electricity for year.
8. We can raise the Ground water level of the total India.
9. We can use even the barren land for agriculture purpose.
10. It is very economical in order to transport the goods through the water way road than carrying through the land way roads.
11. Thousand More people will be employed out of this scheme.
12. We can increase the forestation throughout India.
13. The Government can implement the scheme called boot. Boot means Build own operation Transfer. Through this scheme Government can implement one road way extension and it can be collecting the money as well as the TOLL BOOTH. Otherwise the government can

tender to the private contractors in order to implement the water way road and the concern can collect the money from the public till the tenure.

14. More trees would grow throughout the India.

15. Those trees would prevent the Global warming.

Let us know something about A.C Kama raj who designed this huge plan.

He has dedicated his life since 40 years of life experience by way of researching and working with the project of water way roads and river connection projects. He has individually designed the modern water way road project. He has researched near about 18 years through this project.

Plan 1

Mr.Ardhar Cotton who belongs to England only designed first of all to communicate the whole rivers of India.

The plan which he executed was not the plan of river connection but that plan was Water way road connection. But the England Government refused to implement this plan. They postponed because if these plan is implemented the India would become very fertile and the people would

live prosperously. They developed only the Train Transportation.

They implemented that train way Transportation plan with a view that they can easily scribe and transport the prosperity of India.

So the waterway road plan which was rejected by the England Government by the reason of where the India will be developed.

Plan : 2

Afterwards the scheme K.L rao was developed during the period of EX. Prime minister Nehru. Mr.K.I Rao designed this plan and he was honored by the Prime Minister Nehru as the minister in order to implement this scheme. The name of this scheme is "Ganga and Kavery Scheme. But there was no chance of implementing scheme. They had to dig more tunnels and the usage of more pumps and this plan was so expensive. The Indian Government dropped this scheme because of its one of the reasons that bringing the water beyond the Himalaya. So we should understand clearly that this water way road plan was abandoned by The Prime Minister Nehru.

Plan : 3

The name of this scheme is called Thasthar scheme .This scheme called as the Malai Kalvai scheme also. Mr.Esthar announced that he could connect all

rivers of India. But unfortunately this plan also was abandoned because of the high expenditure and more practical difficulties.

Plan 4

Again another one plan was provided by Mr.c.c patel who was an engineer and the executive of central water fertility.

Plan 5

The national modern water way scheme was designed by Engineer Mr.A.C Kamaraj who was working for long time in the river connection scheme. Now we are looking this scheme.

So only the Modern water way scheme is possible scheme which is more beneficial and very economical too. The other schemes are useless.

There is one of the most frequent questions which are arisen during the discussion of the scientist concerning the Water way road scheme.

1. How there would be the fluent water flow if we organize the Zero Slope channel.

2. We should stagnate the rain water which should not be blended into ocean. Of course the micro organism effect will happen if we stagnate the water. It is against to nature. How to avoid this?

We may find the answers to above mentioned two questions.

1. How the water would flow in the Zero slope channel?

Once again I want to remember you which I above mentioned the proverb” “If you want to testify this concept you yourself undergo with an experiment. The water would flow very fluently through the Zero slope channel as much as we pour the water as long as the channel is extended .More over the water level would be spread in equal height in equal places.

So all the genius have decided that only the Zero slope channel method is possible to irrigate the water for more thousand kilo-meters without the assistance of Motor. IF we understand this scheme we can convert this whole universe as fertile and prosperous.

2. The whole water should mingle into the ocean. On the contrary if we stagnate the rainy water there is a chance of Micro organism default. It means that there may be conflictions in between the Flora and

Fiona. Definitely there is no chance of that chemical defaults .we are using only the 400 pcm of water out of 1500 pcm water through the water way road scheme. Even this water also merge into the ocean after travelled so many kilo-meters through the channel ,so there is no any defects of stagnating this rainy water.

Example: 1

For an Instance the river brahma buthra merges at the ocean of bangala desh after travelled so many states like Arunachal Pradesh, Assam countries like bangala desh .This is an example that there is no fault because of passing so many regions.

Example : 2

The river knavery travels through the Karnataka and dissolve at Tamilnadu. Somebody develops the third questions that there is the chance of the Global warming. Never there would be global warming because the Global warming will be reduced on account of the surplus of trees, plants, creepers. When the water level is increased the heat will be reduced .There is no chance of Global Warming.

The most interesting fact is that he has gone to NASA in favor of receiving the photography of drafts, and Maps when there was no catchment for the rivers of India. He has designed the water way road project after received all the details from NASA. So the total appreciation and proud

would be belong to only Mr.A.C.Kamaraj only.

His qualification is B.E honors I E, He has named his project as National Water ways Development Technology. It is shortly called as Nava Tech. for further contacts: www.nationalwaterways.com/nawadtech@gmail.com Ph : 0452-2589215, 4219215, 95003 32020 What is my requisition is that we all should co-operatively to implement this project in an intensive care of war situation.

Mr.Kamaraj has two plans to implement this project one is Pilot project and another one plan is that Research.

1. Pilot Project

We need a great deal of economical resources and the proper duration is required to implement this project. First of all he wanted to develop the miniature samples to this Pilot project. Those places has been selected at metur, satjanur,mavoor dam.

He requires the Government support and economical facilities. That can be followed by two ways one is that Government can implement this project itself or the government can tender to any private concerns. Otherwise the public itself come forward to implement this project along with the Government

support Mr.kamaraj would command this project.

2. Research Center

We need a huge area of Research center to implement this research center. Near about 100 crocs of money and 100 acres of land is required to do this project.

What is the importance of the research center is that prospecting the view of the disaster of like tsunami, and contemplating about the construction of the channels during the flood situation in addition to that surveying the total raining of every states of India. As well as designing the irrigating channels of the rivers and the connection in between the rivers and the water way roads and the executing the construction and the maintenance of the project.

It would be more helpful if either public or government or any private supporting their contribution to this scheme. If you able to image about this scheme through this article that would be better. Of course if you not able to imagine you can visit to directly the miniature of this scheme which has been designed at kamaraj university on the route of Thirumangalam to virudhunagar. This college is situated at 18 kilometers

distance from Thirumangalam 10 kilometers distance from virudhu nagar and three kilo meters distance from kallikudi.

This miniature of water way road scheme has been erected at the right side of the Kamaraj University.

Our cordial thanks to the below well wishers who had donated for this scheme

- 1.The Former secretary, Er.C.Marimuthu.
- 2.Existing secretary, Mr. Mahesh kumar
- 3.Former President, Mr. M.S.P.R Nivarajan
- 4.Dean, Dr. Sarukasi
- 5.Principal, Mr. Anand
- 6.Department president Mrs. Lakshmi
7. Mr. Velumani.D
8. Mr.Venkataraman.K
9. Mr.Vigneskumar.N
10. Mr.Vaithiyathan.s
11. Mr.P. Ponkarthikeyan

More over our gratitude to Mr. Bose and Mr.Sridhar

As well as our thanks to Mr.Prabhu and other faculties who are working at Mr,A.C. kamaraj sir office.

If we implement this project that may one of the world wonders. Let us unify in order to implement Dr. Abdulkalam `s dream.

Ayakalaikal 64

Part - 3

- Healer Baskar

11. Manthra sasthanam

This art of Mantra chanting explains about the relevant mantras for each and every activity since get up from the bed to go to the bed at night. For example the mantra what should be chanted as soon as get up from the bed while we are rubbing the palms each other. As well as the mantra for touching the earth, more over there are mantras which should be chanted before start the work, before eat the food, and before take bath.

We can memorize and chant these mantras by way of practicing these mantras our thoughts, words, deeds are regularized. Of course we don't know the mantras or we have not memorized the mantras or if we don't know to enchant the mantras we can use our own words. For an Example there is a special mantra for before eating food of course if we don't know the mantras we can pray oh

God let the food be medicine and my heart full thanks you for offering the food me. In addition to that the food give us the hygienic and peace of mind.

The scripture is a holly book which was designed by our ancestors. The grammatical scriptures and the sound Technology also are helping to develop this Vedic book. There is a Vedic book Thirupathkam .we can cure all the diseases by way of chanting this Thirupathikam. There is particular mantra for curing Dum and deaf patients and curing the patients of blind patients. When we are chanting those mantras the deaf are listened and the blinds are visualized. You may ask how it is possible to cure the diseases. This is a magic.

Some vibration develops from our body for each word of mantras .If we able to find out the particular word which is curing the diseases and chant that

particular word consecutively that word becomes mantra. So while chanting the mantras we should listen the vibrations whatever happen in the body than understand the meaning of the mantra. For an example let us explore the valuable mantra sasti kavasam. In that mantra particular word ra ra ra ri ri ri would come sooner we should not search the meaning of the mantra. We should realize only the vibration than research the meaning of the mantra. Recently I had gone to one church along with one of my friends. There some of the persons were raising the pronunciations like ra ra ra ri ri ri .so let us understand that mantras are concerning of the vibrations and benefit them.

So let us educate our children to chant the mantras which we designed individually and live long life.

12.The scripture of omen

The book of omen is to know about the future incidents by way of some gestures which are intimating us what is going to happen in future. This book is helpful us to alternate our life and escape from those evil incidents. For example somebody may say about the omen of Lizard. Our ancestors have already predicted about the benefits of lizard falling on our head, shoulder, falling on the ground. Those are absolutely true. All these prescriptions have been written after a long time research and experience.

As well as they have predicted the benefits about the omen of Cat crossing, overtaking, making noise during our travel. Our ancestor predicted whereabouts of the water and what animal is before us everything by way of the noise of birds, animals. In addition to that they have predicted about the rain falling in accordance to the height and the speed of the cloud.

Generally our ancestors would say as bad omen the mirror breaking, light offing events. Really when there is no peace in the family the mirror will be breaking, and the light will be offing. According to these events we should understand about our bad time and perfect that.

Our ancestors educated us to create a statue of Maha Ganapathy which is made of the cow dung to keep on the courtyard. As well they have predicted about the omen according to the insects like ants, worms, approaching towards that cow dung statue. If the statue is as it is they would be more profitable. So they could predict about the vibration of the Environment according to the cow dung statue.

Hereby I request all of our friends to send their knowledge about the Omen.

The scripture of Sculpture

This scripture provides all technology to sculpt the statue. The scripture is dispensing the whole detail about the art of scripture such when we should sculpt the statue and benefits of that time, how the design of the statue? What sort of material we should choose for chisel the statue and what are the accessories to chisel the statue? Whatever materials are apt for making statue .I That is our decision whether we should learn the art of sculpture or not. That is their own Interest learning the Art or not .Any way our ancestors have designed this art as the 13th order out of 64 arts.

Don t concludes statue making means chiseling only through the granite stones. If we learnt the art of Sculpture we can create the statue through either materials like sack piece, rice, or clay soil. Those would be very helpful to our life. We can use our handmade articles as handcraft.

The art of sculpture would be very useful to us and our family persons and children.

14. Medical Scripture

Our ancestors have educated us to get rid out of all sorts of diseases by means of all medical techniques. They have taught us how to change the food as the medicine? How to convert breathe as medicine? How to change the work as the

medicine? How to change the sleep as the medicine? They have educated all the kind of treatments like Herbal, chemical, and tablets.

This medicinal art only is being educated to the public at our kovaipudur NISTAI international training center in the five days camp. The persons who are not able come to NISTAI foundation can watch the DVD VIEDIO.

15. Anatomical scripture

The anatomical scripture is called as the "Samuthrika ". The anatomical scripture would predict about the attitude and character of the man or woman by means of looking their anatomy. Through this anatomical scripture we can predict the attitude and character of our friends, kith and kinds and we may know how we should associate along with them in the business, politics etc, etc.

As well as we can analyze about the future, attitude, anatomy of one person`s palm print, moles and gestures. The art of anatomical scripture is ordered as the 15th art out of 64arts.

If anybody who they had known the Art of anatomy can send their knowledge of anatomy "SAMUTHRIKA" that would be shared with universe.

How to Get healthy baby

What we should do for giving birth to a hygienic baby?

The activity of the pregnant ladies becomes the basic for giving birth to a hygienic baby. Since the lady becomes pregnant of the third month she should keep a pillow in between her legs and sleep one side posture. As well as we should keep the pillow under the right leg when she sleeps towards upside. By way of this style the baby which is inside of mother`s womb can get profuse of air circulations and it develops the way for the free delivery. More over it fluctuate the anus for the fluent air circulation and enriches the health.

As well since eighth month of the pregnancy she should hold the stomach and walk. As much as she walks there is a chance of the free delivery.

BE COURAGEOUS

How to be courageous?

If we should be more courageous we should know one subject very clearly. We should listen the event when it begins and when it concludes. The first thing what we should is that we should get up from the bed as soon as we awoke .If we are sleeping delayed our confidence would be reduced.

As soon as got up from the bed we should count till 5 numbers and leave for the morning routines and bath. If we do such a way our lever is functioning properly so we would get more courageous to achieve anything.

Well read ...

What the student should do for studying long time?

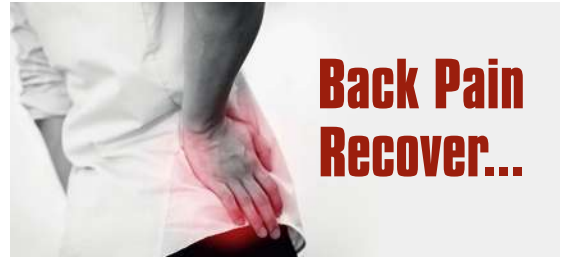

If the student should study for long time they should read first the important topic and the additional topics. We should continue our studies during we feel tired. During the time of feeling tired we should keep water in our mouth and walk for some movements. Afterwards we should spat that spittle water and release the urine then we should start to study .If we do like this we can Study for another 2hours continually without tiredness.

How we can cure the brain fever?

When our palate of our mouth is arrested the passage which supply the glucose and oxygen towards the eyes by way of the fat and the oil it develops the disease brain fever Pig swine.

On account of this obstruction the heat which develops from the brain is sustained without refrigerated. In order to dilute the heat we should gargle the water through the mouth and spat away 20 minutes once. By way of this practice the fat which developed on the palate would have been dissolved and we would recover from the disease.

To recover the Hip pain.

We should drink the hot water after blended with the half spoon of Asafetida and half spoon of salt. Afterwards we should walk backwardly if we do like this the gas would be released.

The life Education A little Story

One kind of birds Generation had been destroying at the North America. That country decided to protect that spoilage. In favor of that a special place had been allocated and those birds had been protected. That bird was allocated a special room and special attender like all sort of facility was organized. In addition to that a special air-conditioned room also was organized. After the generation of those birds those birds were sent to the external world. Those birds do not know about their enemies. But they became food to the enemies. They do not know how to sit on the electric posts so they burnt and died. What effort was taken in order to prevent the generation of the birds became the pitfall of killing those birds.

As well as we provide all sort availabilities to our children whatever were available to us. On other hand we are the reason for their slump.

The animals which are in the park do not know to hunt. As well as our pet children cannot bare the failures. Let us liberate the way to our children to realize the exterior world.

You need not have the doubt that you have cherished your children with more affection and how they go to manage this world? This society would teach the lessons whatever we forgot to teach our children as well as how the society taught us the lesson.

In English they would say Survival of Fittest. All human births are running back to that.

If we believe that would happen

Once upon a time a saint had visited to one village. He stayed at one of the monastery and preached good perceptions to the people.

“God is Omni potential; nothing is impossible by God “All of the activities which are committed on the name of God would be succeeded. While he was speaking at the crowd suddenly he mentioned one mantra and said that we can walk even on the water if we chant this mantra.

There was a person among the crowd who had to across the river to reach his house. Every day he was using one bridge which was very far. As soon as the value of mantra he was so happy.

The same day he stood on the river bank when he returns to home. He chanted the mantra of GOD with total confidence. He stamped one of his legs on the flowing river water. Now he was standing on the water. Consequently he was stepping the legs .But he never drowned. As well he reached the next bank.

He was so surprised he could not control his curiosity. He was praising more along with his mother. He decided to honor that saint by way of inviting that saint to his house and organize one nice feast.

The next day he crossed the river by walk and invited the saint to his house for the feast. The saint also accepted for the feast that gentleman told that he would come in the evening

and take him to his house.

That day that saint started along with that man for the feast. Both they reached the river bank. That gentleman chanted that mantra and stepped on the river and he turned back and watched the saint. That saint was standing on the river bank .The gentleman shouted the saint to come back him. But the saint was standing on the river without knowing anything. Again when the saint returned back to the saint and dragged his hand but the saint released himself from the man`s hold and asked him where is his house?

That gentleman showed his house .but the saint asked that is not there any facility to cross the river ?The man replied that why we require the boat just it is enough to chant God`s mantra which you taught us.

The saint replied that what mantra I taught you simply I have spoken so many words out of that which word I told .Again the gentleman replied that sir you only told that word for walking on the water you just keep the leg on the water by chanting that

mantra which you taught you can walk.

The gentle man frightened and my dear son I told those words just for the speech for explaining you about the God. Don't believe that completely. But the gentleman replied that no sir those words are very powerful because I could walk on the water both previous evening and this day morning.

Again that saint doubted whether that mantra is powerful or not. Let me try to walk on the water. That saint hesitated and stepped into the water by chanting that mantra. But he drowned inside of the water .when that gentle man turned back this saint was standing inside of the water. The gentle man believed that saint words properly and that mantra registered strongly at his sub-conscious level so that benefited him.

But the saint did not believe properly so that thought was not sent to his sub-conscious level that is the reason he could not walk on the water.

GIRIAYYA PUBLICATION

THE EDITION OF THIS MONTH

Thirumathy Malika

THE ART OF

LOMORIYA COOKING

The grain foods are only our traditional foods. These grains are the gift of God which god gifted us in accordance to the climatically conditions.

But nowadays the grain foods are disappeared and the curiosity of people has been increasing because of the foreign foods.

The effort of this book is motivating the public to convert towards the ancient foods from the modern foods.

Let us know through this book the benefits about the grain foods and how to cook these foods.
