Endear friends,

I had published one audio script through the YOU tube on previous December 16.12.2017 .I had mentioned about the family persons who they had been tortured and affected by the Allopathic treatment.

The married couples Mr.Sathis and Mrs.Nandhinee who belongs to Kankeyam ,Tirpur district given birth to a baby through the Natural method .Meanwhile when they have been preserving the child's novel thread without disconnect from the mother`s novel. This group of people had gone to their house with a view of affecting that couples.

Near about 75 persons like chief doctor of Government Hospital ,Thasildhar, collector of Tirpur and more nurses have gone to that innocents house on commend of the Health minister .

Not only That Group has trespassed into their house and arrested that couples lest they should move away as if they are in house arrest but also threatened them to disconnect the novel thread. I have explained elaborative about their atrocity on that innocent couple in the YOU tube. If I want of write through the magazine the space will not be enough.

When we see all these atrocities we feel like our privilege and human right is confiscated from us. Hereafter we should protest against these kind of in humanitarian atrocities together. Now we are in the necessity of protect our human rights and strengthening our unity.

உறுதிப் படைப்புகள்

Method of Soaps

Manufacturing in house.

Healer Baskar, Founder
Anatomic Therapy Foundation.

Recently we have published one article in the magazine also a video concerning the Topic called the coconut oil soap through the YOU tube. The motivation of publishing that video and article is that developing awareness through scientific explanation about the demerits and defects of using the shop selling soaps lest they should use those soaps.

The magazine and video had been published with a view that we should manufacture the soaps ourselves instead of purchasing from soaps. But after released this video the public used to communicate me and informing that they use to purchase the soaps from the producers in addition to that they have become the distributors of those companies' feel so bad when they say like that.

Endear friends I have explained very clearly how to manufacture the soap at our house ourselves but nobody have phoned me that they start to manufacture the soap themselves .If it is continued one day the

businessmen called illuminates would purchase the total concern. More over all my efforts to make the public to understand would be wasted.

Please listen one subject never I have used the word to use this soap. I believed that you would testify at least 10 soaps from the shops and you would produce yourself. Therefore I have been compelled to write the article again. We are going to learn how to produce the soaps ourselves at house and distribute to our neighbors to be benefitted.

Let us learn to produce 10 kinds of soaps through this article.

1. Conunt oil soap
2. Neam soap
3. Alovera soap
4. Neam and alovera soap
5. Cikai Soap
6. Herbal Soap
7. Cikkai and Herbal soap
8. Ash Soap
9. Ground net powder soap
10. Green Gram soap

The features More features are in this homely made soap

1. We do not need electricity
2. There is no necessity of Petrol, diesel, or kerosene
3. We do not need the Machine
4. We do not the weighing machine
5. It is enough to use the caustic soda
6. It is very productive because it is manufactured at the home.
7. No palm oil wastage is added
8. The notorious poison called SLS chemical is not used in this process.

The ingredients of Soap

Caustic soda 165gram
Ordinary water 380gram
The original coconut oil which is made of check machine 1kg

The method of process

We should have the 380gram of water in the bowl and we should blend 165gram of Caustic soda. After blend both water and caustic soda we have to wait for one hour. Because the caustic would get heat as soon as mix with the water we should wait for quenching. After ten minutes we should pour 1 kg of coconut oil inside of the mixture. Afterwards we should blend the mixture very casually through the glass stick or wooden stick. Likewise we should blend for half an hour till it become dosa flour level.

We cannot pour the both the solid mixture or the liquid mixture inside the die. So only the level of dosa is relevant to produce the soap. After pour into the die that mixture would become as the soap within 24 hours.

According to the above mentioned ratio and quantity we can manufacture only

16 soaps out of that level. Each soap would be consisting of 80 grams.

Caustic soda

Caustic soda is one of the most available chemical which is available in all chemical shops. We can buy the caustic soda by searching. We should handle this caustic soda very carefully. If you touch you would feel itching. It would develop the itching even there is a little sweating. More over us should keep this in a secured place lest the children should touch that. Otherwise that would cause more effect whether they eat or touch that.

The only precautions thing is that handling the caustic soda and keeping the caustic soda very carefully. So the manufacturer should take an intensive care to safe this caustic soda.

Die

If we want to find out the different kinds of Dies we can search through the internet. The cast of those Dies are very costly. Instead of that we can use the ordinary dies which are available at our house. Instance the empty match boxes, cartoon boxes, or the little plastic boxes can be utilized for making soaps.

Even we can use the paper cups from the shops. The one reason is that it is

so cheap on other hand we can easily separate the soap from the cup without damage and again we can use this kind of cups. Likewise you can individually think and find some more dies.

Weighing Machine

The weighing machine is required in order to weigh the ingredients of the soap manufacturing. Of course if we do not have the weighing machine there is other method to blend the ingredients of the soap in proper ratio and produce. This method would be very convenient you to prepare the soap notwithstanding the weighing machine.

One Cup of Caustic Soda =2 and half cup of Water=6 and half cup of Coconut oil ratio is required to produce the Soap. If we use this quantity of ingredients it is not necessary to use weighing machine.

Coconut Oil

The coconut oil should not be the coconut oil which is sold at the shops. That coconut oil is driven from the crude oil which is the byproduct of the petroleum called Liquid Paraffin. So please remember that the coconut oil which is used from the shop is not an actual coconut oil.

Therefore we should use only the coconut oil which is driven from the refiner. Nowadays we happened to hear that there is adulterer even in the refiner too. When we cut the coconut into so many pieces and dry in the sunlight would be more convenient to refine.

So many persons do not heat at the hot sun even three days. Some more persons do not dry on account of not having

the sun light. In addition to that they apply some chemical called sulfur in order to bring the coconut in a dry manner. When the chemical sulfur is burnt the coconut and

capacitate the coconut to refine shortly. Hence we should use only the coconut oil which has not been contaminated by sulfur, because that would cause the illness to health.

Smell

The soap manufacturers are blending the perfume called essential oil into the soap in order to bring the smell during the bathing. The 5 to 10mile liter soap essence is available up to Rs 5 to 500. Manufacturing through this kind essential soaps are sold door by door as the name of neam soap, Papaya soap. So it is advisable not to use these kinds of soaps. The smell is not necessary inside of the soap. So we are advised not to use the essence in our house made soap.

The kinds of bathing soap

I want to register and explain before knowing the kinds of Soaps. All the soaps should be made of only through the pure coconut oil. When we manufacture the soap through the coconut oil we should add only 10% of other ingredients. Whatever ingredients we add soap will be molded

similar to the Mixture.

For example if you want to manufacture the neem leaf soap you have to add 10% of the

neem oil or neem powder into the 1 kilo coconut oil.

We can use the below mentioned soaps for bathing

1. Coconut oil soap
2. Neem oil Soap
3. Allovera Soap
4. Allover a and Neem mixed soap
5. Ground powder soap
6. Green powder soap
7. Sekai soap
8. Harapu soap
9. Sekai and Harappu soap.
10. Ash mixed soap

Likewise we can make different kinds of soaps. If whatever soaps we should remember one thing is in the mind that we should use only the coconut oil to make the soap.

But there are some difficulties to be faced in the process of making the soaps. What is the ratio of the ingredients and how to pour on the Die? But when you practice continuously you would be very an expert of soap making.

Forth

The current period all the soaps are bringing more forth because of mixing the chemical called s.s.s which would cause more dangerous to the health. So please do not mix the chemical called S.L.S in our manufacture. Spontaneously the forth would come more on account of producing through the pure coconut oil.

If that forth is not sufficient there is another way to bring more forth. First of all drench the poondhi seeds inside of the water. Later we should boil that water and keep in avessel and mix in the soap mixture that would bring more forth.

This poondhi seeds are very unique seeds .These kind of seeds are available throughout India. If we seedle nearby the vacant place of our house that would grow more. These seeds have the value of purifying water, therefore when we grow these seeds nearby the river and water reservoirs that would purify the water sources.

North Indians are using these poondhi seeds as well as the south Indians are using the Theta seeds.

Already we have seen that the manufacturers are mixing the poisonous chemical called S.L.S in favor of bringing more forth. Those people use this chemical on account of it is available with the free of cost.

I was in search of manufacturing the soaps at house for a long time. So many persons are hesitating to say about the manufacturing by the reason of that where their business would have been lost and

where the people would not come to buy the soaps if they reveal the truth.

Likewise I have met so many persons in my life in order to know the details of soap manufacturing. Decisively I met Mr.Prasanth and perceived about the soap making process. I say my valuable thanks to that gentle man at this golden movement.

Mr.Prasanth had completed his Mechanical study at Tamilnadu College of Engineering and learnt the Acupuncture study after worked as an Engineer. He has learnt the Art of Acupuncture from my Master Nature Kumar at Coimbatore. Moreover he has worked along with the Agricultural scientist Nummular. Now he has been learning law at Law College. Since one and half year he has been involving in this soap manufacturing business. In addition to that he has been teaching to his friends to produce the Soap.

His view is so unique .He has been

doing this service with a view that the world should change towards the nature. He has experience in so many ways to develop the natural products but he has been failing from all efforts decisively he decided to manufacture soap.

08 | JAN 2018

www.amaithiyumarokiamum.com

He has found this soap manufacturing process in a small budget by dint of not having the financial back ground and place facility. If you organize minimum 100 persons to learn the soap making he would come and teach at your place. In need your convenience you can go to Tirpur and learn from his place. He has been living at koolipalayam, you can communicate through the mobile and meet him.

In the Absence of his presence his mother would teach us to prepare soap. Once she was working at one Textile company but now she has been working completely at soap factory.

(Part 4)

- Healer Baskar

16. Ethics

Ethics means explaining elaborative about the king, human or a Guru. This is an art of narrating and studying about the above mentioned persons and interpreting to the public. It is being exaggerated in order to making the public to understand how to live or how not to live. Totally speaking about bio-grapy is called Ethics. A few ethics are saying only the truth but so many ethics are half true and another half is false. If we should advice to people we should say through the story telling manner on the contrary if we say as an advice the public won't hear.

The Ethics are developed in favor of making the people to understand easily when we are saying the story of great Guru, kings and human. What is the important message in the Ethics is that the whole book would be in the prose manner we will not find the lyrics, myths, and imaginaries.

Likewise so many Ethics have been designed at different countries by different type of people. How we call as Ethics as well as it is being named in different countries in different name. Generally it is praised as History.

When we say the old ethics to our children they may say it is boring. We may handle any kind of techniques to make them to understand. Even we may create some Ethics and say them. We can add some heroes of this latest trend in accordance to this contemporary.

For an example we may say about the latest hero of the Agriculture Mr.Namalwar who had been doing and saying his valuable experiences to public. When we say about his bio-grapy that would motivate the children to know more about the Agriculture.

We can do so many things through the Ethics that good information would

register in the human mind well. We can say about the latest heroes and their adventures and social services to the children. So scriptures are good.

17.

Is a creation which is centralized on some romantic persons or romantic couples through the different kind of imaginary songs? The poetry is being decorated through the poems, dialectical words, and some mysterious in favor of the readers enthusiasm.

When a teacher creates one poem through his poetry power and imaginary power it is called. Generally the poem is composed due to the entertainment. Meanwhile some poems have some potential meaning and philosophical knowledge. The creation belongs to the poet mentality.

So we should teach to children the kaviyams .when we teach children we can make them to understand so many things. If we don't know the old kaviyams we ourselves can make the kaviyams. The parents can create some kavyams instead of wasting time by watching serials.

18. Alzhangaram

It is necessity to speak about the grooming, because everybody would know. The decoration means decorating ourselves. For an example applying the tattoos in the hand, decorating the hair in different style, Keeping thelak at the forehead, wearing such handsome dresses in accordance to the color combinations are called Art of Decoration. If we should say in Tamil language it is called Self-beautician. In that

course of time they have been teaching this as an Art. Because we have more confidence while we are decorating ourselves. First of all we like ourselves then others associate us very fluently.

Many people do not decorate themselves. They say that they would say they will be like this. It is every one personal interest. Some people addict to that it is not fair.

Decorating us ex-ordinarily as if irritating others is a bad habit. Same time you should understand that being ugly is not so fair. We should decorate ourselves in a normal manner lest others should jealous on us with regard to the situation and circumstantial. After learnt this attitude and applying in our day to day life that would be more proud.

The self-Exploration is called an inner engineering. Decorating ourselves is a kind of meditation. Let us learn the Art of decorating ourselves and teach to the children.

19.Art of speaking

The art of speaking means the acoustics speech .Speaking sweetly, speaking attractively, speaking boldly, speaking courageously in need, generally learning the art of speaking with proper articulation is called Madura padanam. Many people speak commonly instead of that there is a method to speak in accordance to the circumstance and situation. When we speak a word the meaning will be differed with regard to the way of speaking and anatomical changes and the rhythm.

For an example we can change the word Nalla eru however. When rhythm is changed a little that will mean that Nee Nalla Erruka Mattai. So speaking is an art. We should speak boldly at some place laughing manner, some places musical speaking. It is told in English Sugar Coated words. This is what Tamilians say Madura Language. It is important to speak in an attractive way.

When we speak we should speak lest that should be understood by others. We should speak sweet Meanwhile we should speak lest that should hurt others. Nowadays everybody speak similarly in the public stages. Some grammar has developed to the stage speech. Everybody Xerox that and speak. Who speak in their own style would be aspired by universe.

We need not go to any training center that we should speak intelligently. We can learn ourselves. we should listen during others speak .sometime the opposite person would speak better than me. During that movement what would do is that we should learn from them.

Of course when we consider about our speech if anybody speak how they would have spoken. As soon as observed that speech we should change our body language and style. But so many persons among us do not listen how others speak. They would speak themselves. They would not give room to listen other speech.

Whoever speaking themselves without listening others would have less knowledge. According to them they would be thinking that they are unique. Others

would leave them as an innocent.

We can catch public mind through watching others speech and change our speaking style. Art of speaking is opportunity us to live a long life and interact other relations.

Many people have good heart and good thoughts. But they are intricate on account of their unbalances of speaking and using the words. Somebody lamenting that they are good one and why there are more problems to me. It is very important that speaking sweetly in many places.

Why public is loving my speech is that I am watching for long time others speech. I feel about the pain and dullness while others are speaking .Having those experiences in my mind and I practice daily and improve the knowledge of Speaking.

I like both Vethatri sir and Ravi Shankar ji because they would have spoken in a perfect articulation.

20. Drama

If we say in current language Drama is a Cartoon. Nowadays the children do not listen the school studies but they watch only the Cartoons. Many parents are worrying about that. Do you know why the children do not go to school? Why the like to watch the cartoon channels?

Generally the children like something. That is children attitude.

1. Story
2. Animals
3. Image

4. Fancy
5. Dance
6. Song
7. Music
8. Body Shaking

Unless we add these 8 things then only we can register something in the children mind.

The above mentioned message is not only to children but also to Adults. That is why our ancestors composed these 8 things on the name of ORCHESTRA and contributed to public.

Why they contend the Drama with more good things and stories because those would reach the public very easily.

They made the people to understand by way of showing the animals face, trees, birds; speaking animals likewise image differently and contributed to public. Nowadays that art has been converted as cinema and cartoon.

Drama is an art. Everyone is will be expert in every different Art. Somebody would make us to understand by Speaking .Somebody would make us to understand by conducting Drama. Drama is helping very much to understand the concept than the speaking.

Though I make to sit 1,000 more persons only 300 persons understand, the other 700 persons do not understand. If I explain these concepts through the drama, Music, Dance, Story certainly the whole 1,000 more persons would understand. By

dint of not having the art of Dram I am explaining through the speech.

For an example I have spoken for a long time about the house way teaching method which is called Banu House way Education with regard to the educational system. I have uploaded in the YOU tube, but one cinema director had developed that concept as a film for 2and half hours.

When some good subjects are established by way of the good hearts who knew the art of drama that reaches very shortly. So what is my requisition is that those good hearts should be saying the good subjects to the public through short films, short stories or cartoon.

Therefore, if we teach the drama to children, right from the beginning that would be very helpful to them.

If you want to understand completely about the Art of Drama please view the video through the internet on the topic of Cartoon Education

(www.selfeducationathome.com).

Let us continue the other episodes on coming Editions.

My honorable thanks to Mr.Manikandam who had made me to understand about the Arts of 64 Arts.

The Treatment for decayed leg of sugar patient

“The Mangoes Treatment”

- Healer Baskar

Already I have told you about the treatments for the decayed leg of a sugar

patient. The patient may cure his disease by way of participating in the Five days camp Anatomic Therapy which is conducted by me MR. Healer Baskar. The patients who they not able to attend the meet can cure the disease through watching the DVD of my anatomic speech.

We are going to introduce one peculiar treatment which would cure the disease very shortly. The name of the treatment is Manucose.

We should prepare something before start the treatment called Manucose. First of all we should have the boiled water in order to cure the decayed legs. Mix some lemon juice inside of the hot water.

We have to separate this water after blended this water. Later take a cotton piece then drench into this lemon mixed water and wipe the scare cleanly. We have to prepare the lemon mixed water more in

favor of washing the scare after the Manucose Treatment.

The second thing what we should do is that we should cut a part of cabbage and grind as paste through the manual Grinder or maxi. We should collect the ground Cabbage and squeeze lest the whole juice of the cabbage essence should be extracted. After extracted the whole juice we can avoid the juice and only take the fiber the cabbage.

We should mix the clay in the proper ratio along with the extracted cabbage paste. This is the Medicine. Later we should apply the paste on the effected are for 1 inch thickness. Then it is advisable lest that medicine applied area should be kept in the sun light. Though there is no sun light we can keep the leg after applied medicine.

After half an hour we have to wash with the lemon water mix. We should be following for continually 30 days. If we are doing this treatment continually our spoiled

leg would become fresh one.

The important message is that we should wash the legs through the lemon water before apply the medicine or after removed the medicine. We should not use the ordinary water.

Note:

The water which is being used to clean the scare should be only the lemon mixed hot water.

It is more advisable to use only the organic cabbages which have been cultivated by natural performance. In case of not available of the organic cabbage we can use the commercial cabbages.

We have mentioned only the approximate ratio concerning the Lemon water, cabbage, or clay, but the patient can prepare according to his convenience.

This Manucose treatment would be very convenience to cure the decayed legs. So the effected victims can be benefitted through this Manucose treatment.

Let us benefit out of this Manucose treatment and live a long life. My cordial thanks to Mr.Selvakumar.

Let us grow the Tamil

I looked at the Tamil book of the 6th standard student. Out of that book one question was asked to write 1 to 0 in Tamil. By reason of not knowing I asked that boy. soon he say 1,2,3,4,5,6,7,8,9 in Tamil. I asked how you memorized that. She answered that her teacher arranged the Tamil words through the sentences.

How to prepare the Natural HIT

- Healer Baskar

The liquid called replant is being used all sort of mosquito coils in order to drive the mosquitoes away. Actually the liquid called replant is named as coarsen, country oil etc, etc.

Generally the manufactures are using the coarsen oil inside of the Mosquitoes coils and inside of the Coach roach killer called Hit in order to kill the lizard, mosquitoes and Coach roach.

A long time back we had been using only coarsen or Krishna oil at our house. During that period this coarsen was in the day to day usage. While we were using coarsen there was no the haunting of the mosquitoes.

This world is being ruled by only the Roth child and illuminates who is called as the president of the world level fools who has been befooling and doing business. All

they have found a way to drive the mosquitoes that consuming the coarsen oil wherever the mosquitoes are ambulating. They invented one instrument in order to delete the smell from the Krishna oil. The name of the machine is called KEROSENE DEODORISER MACHINE. Through this machine we can drive the actual smell of the kerosene in addition to having blended the chemicals and manufacturing the mosquitoes driving coils and the coach roach driving chemicals which would cause the effects to the human.

These kinds of chemicals are being sold and earned cores and cores on the name of Pest controls as if they would product the buildings from the coach roach. The mosquitoes killing coils are being manufactured by only one company. This company belongs to the illuminates. There are no machines anywhere in the world which would produce the machine for mosquitoes killing chemicals. Nobody has the license to manufacture to develop the

machine. Nobody knew about the manufacture of the machine. They keep that very confidential.

I came to know that secret through one of my best friends that the kerosene is used as the mosquito rider. Now I am sharing this secret along with you and our friend requested me not to release his name. So please try to understand that they are selling for the high price which is available for the least price.

Hereby we request you not to purchase any kind of mosquitos' coils and coach roach killers from the shops. As well as do not waste the money for the pest control. In place of that allocate more windows and doors to prevent us from the mosquitoes.

Of course if it is not possible we should organize one exist nearer to the roof level just 2 feet from the ceiling level in addition to that fix an exhaust fan just opposite to the exist. so the contaminated air would be coming up from the living room the fresh air which has the density would be sustaining in the low level the family persons may have the fresh air instead of the Air condition.

More over you can fix the mosquito net towards all the windows and doors. If you want to follow the natural method to drive the mosquitoes and the coach roaches you use the kerosene oil through the water presser which is being used at the barber shop for applying on the customers head. All of my friends if you have known either

confidential in formations please inform to me I would inform to the world.

What is the essence of this article is that the counterfeit merchants are selling such kind of adulterant commodities to the public and earning the money. so we have to refuse this.

What is called self-oriented life means turning towards the nature and manufacturing all of our daily routines ourselves in a natural manner?

Only

2018

It is not a lyric: It is an education;
Yes It is a life of our ancestors,
when we do not know the value
of our ancestors' life how our
Grand children would know? This
ancient lyric education would
teach us the good, apt, simple,
traditional, organic self-oriented
life style to us and our
Generations.
